ARTS FROM THE HEART

Dear art lovers and friends of Slovakia,

Pablo Picasso, famous Spanish surrealist once said: „The purpose of art is washing the dust of daily life off our souls “. Lebanon now more than ever is the right place to wash the dust off hard life. The many challenges that the Lebanese are facing need to be softened by cultural medicine. And Lebanon and Slovakia have so much in common, therefore do not miss the opportunity to see the artwork of our contemporary painters.

Art influences society by changing opinions, instilling values and translating experiences across space and time. Research has shown art affects the fundamental sense of self. Painting, sculpture, music, literature and the other arts are often considered to be the repository of a society's collective memory. Art preserves what fact-based historical records cannot: how it felt to exist in a particular place at a particular time.

Art in this sense is communication; it allows people from different cultures and different times to communicate with each other via images, sounds and stories. Art is often a vehicle for social change. It can give voice to the politically or socially disenfranchised. A song, film or novel can rouse emotions in those who encounter it, inspiring them to rally for change. Medical researchers, who have long been interested in the relationship between art and the human brain, now strongly believe visual arts have positive effects on personal lives.

The Embassy of the Slovak Republic in Beirut together with our artists and painters from Slovakia would like to see such positive effects on as many personal lives all over the world as possible.

Mr. Marek VARGA

Ambassador Extraordinary
and Plenipotentiary
in Lebanon, Jordan & Iraq
Chargé d'Affaires to Syria

"The word art contains a broad concept of information about the time in which we live. It is an imprint of the contemporary system of values for future generations, prolific communication between the people and nations. And thus, it is so important and weighty.

Contemporary Slovak graphic and visual arts are just like the visual arts anywhere in the world: manifold in expression, authentic, comprising a broad diapason of techniques, motifs, colorful variations and messages, reflecting the identity, smell and flavor of Slovakia, as well as the pathway to values. Artistic presentations as archetypes sweeping through the centuries and round the globe produce meaningful ideas, beauty, complex features and culture of their own.

I am introducing the artwork of nineteen authors, a sample of art that has been currently created in Slovakia. By the graduates of academies of art and other exceptionally talented artists tutored by art studios and personal experience of significant artists. Therefore, the creations and artistic expressions are so diverse.

Fine art has always been and still remains to represent a valuable dialogue between the nations. Its specific manifestation provides for the language easily comprehensible without any words. When interpreting stories of life, its challenges and victories, the fine art produces beauty and smiles, an added value quite difficult to describe. The present-day fine art is mostly about what we live through, about the emotional impact of the strength of a piece of art on the viewers."

PhDr. Ľuboslav Moza, PhD.
